TITLE Population Trends for Washington State. 1995.
INSTITUTION Washington State Office of Financial Management, Olympia.
PUB DATE Oct 95
NOTE 71p.
PUB TYPE Reports - Descriptive (141) -- Statistical Data (110)

EDRS PRICE MF01/PC03 Plus Postage.
DESCRIPTORS Birth Rate; Business; Change Agents; College Students; Correctional Institutions; *Demography; Divorce; Ethnic Distribution; Higher Education; Income; Institutionalized Persons; Marriage; Migration; Military Personnel; Nursing Homes; Older Adults; Population Growth; *Population Trends; *Predictive Measurement; Prisoners; Racial Distribution; *Sociocultural Patterns; Statistical Data; Tables (Data); *Trend Analysis
IDENTIFIERS *Washington

ABSTRACT

This document provides tables and figures of current demographic data for the state, counties, cities, and towns of Washington. The report is divided into two main sections: (1) "State, County, City Populations"; and (2) "Selected Estimates and Information". Section 1 presents such data as: population change and net migration for 1950-1993; percent of population growth by region for 1970-1995; components of population change for 1910-1995; population of cities, towns, and counties for 1990 to 1995; rank of cities and towns by 1995 population size; housing units by structure type for cities, towns, and counties; Section 2 contains such data as: percent of county population 65 and over; selected institutional facility populations by county for 1980 and 1990-95; resident armed forces personnel by county for 1980 and 1990-95; median household income by county for 1989 to 1995; fertility rate for 1930 to 1995; intercensal population estimates by county and by city by county for 1980 to 1990; 1990 U.S. census figures by racial categories and Hispanic origin by county; and population estimates by racial categories and Hispanic origin for 1991-1994. Section 2 also contains a list of Washington State Data Center/Business and Industry Data Center organizations and contacts. (CK)

Population Estimates Development

Population estimates are developed as accurately as possible from standard and tested methods. The specific procedures used depend on the availability of state and local area data. *State estimates* are developed by a component method. Population age 64 and under is developed from vital events and an estimate of net migration based on school-age migration and wage and salary employment change. *County populations* are developed by three methods: the component method, ratio correlation, and the housing unit method. Ratio correlation relates the change in population to the changes in a set of symptomatic data over the last decade. The current equation contains school enrollment, voters, auto registrations, out-of-state drivers licenses, and natural increase. Changes in the symptomatic data are then tracked annually over the next decade to estimate population. The housing unit method estimates population on the basis of housing change and assumptions about occupancy rates and average household size.

City populations are both estimates and actual counts. About 30 cities count their population each year. The housing unit method is used to prepare estimates for the remaining cities. Cities report the changes in their housing each year, the count of persons residing in group quarter facilities, such as nursing homes and correctional facilities, and annexations. The reliability of the housing unit estimation method depends on accurately determining all of the factors required in the calculations: the current housing stock, the occupancy rate, and average household size.

Federal and special censuses provide more than a count of a local jurisdiction's population at one point in time. Censuses provide benchmark data on the number of housing units, the occupancy rate, and the average number of persons per household. When developing an estimate, average household size is usually trended on the change in household size between the last two census points. The occupancy rate at the last census is usually used in developing the population estimate. More recent data may be available, but in many cases more recent occupancy surveys may not cover all housing in the estimation area or use a similar definition of occupancy.

Preface

Population Trends provides current demographic data for the state, counties, cities, and towns. April 1 population determinations developed by the Office of Financial Management (OFM) are the official state population figures. Annual population figures for Washington's cities, towns, and counties have been developed and released for over two decades. These estimates are cited in numerous statutes using population as a criteria for fund allocations, program eligibility, or program operations. Recent legislation specifies the use of the Office of Financial Management's April 1 population estimates as criteria for determining county participation in the Growth Management Act.

The 1995 population estimates for cities and towns presented in Table 4 will be used in the allocation of state revenue beginning January 1996 (RCW 43.62.020). Population estimates for counties are used to allocate revenues as specified by RCW 36.13.100. Revenue allocations to counties using the 1995 figures will begin with liquor profits in September 1995 (RCW 66.08.200).

Population figures presented in this publication represent all the persons who usually reside in the area designated. **This includes military personnel, military dependents, persons living in correctional institutions, persons living in nursing homes, and other care facilities. College students are considered residents of the place where they live while attending school. Seasonal populations, such as vacationers or migrant farm workers, are considered residents of the place they consider their usual residence. Persons with no usual residence are counted where they are on April 1.**

Should you have any questions or suggestions regarding the content of this publication, please contact the Forecasting Division of the Office of Financial Management at (360) 753-5617.

Special thanks are given to the following persons and agencies because of their continued help and cooperation in the annual publication of *Population Trends*: the Center for Health Statistics, Health Information Division, Department of Health, for supplying vital statistics data; the Office of Research and Data Analysis, Department of Social and Health Services, for providing selected institutional population counts; the Department of Veterans Affairs, for furnishing veteran institutional counts; the housing directors of the colleges and universities, for submitting April 1 dormitory counts; the armed forces personnel at major bases in the state, for contributing data on current resident military counts; and all of the city staff, and county and regional planners, for providing data used in the development of the April 1 population estimates.

State, County, and City Populations

Washington's growth continues at a moderate pace. The state's annual population growth rate continues at 1.8 percent for the 1994-95 period, identical to last year. Total population increased by 95,500 with the state reaching 5,429,900 as of April 1, 1995. Current annual increases approximating 95,000 per year represent moderate growth, but are lower than the increase of 124,200 (2.4 percent) for 1992-93, and the annual change of 138,600 (2.9 percent) during the 1989-90 peak growth period.

Births, deaths, and migration are the drivers of population change. Natural increase (births minus deaths) now adds about 38,000 persons to the state's population each year. This is about forty percent of the state's annual growth. Net migration (people moving in less people moving out) accounts for the remaining sixty percent of the annual population increase. Migration is usually the most variable component of population change and is difficult to estimate or predict. Migration usually reflects population movement induced by economic opportunities, but may be affected by non-economic factors.

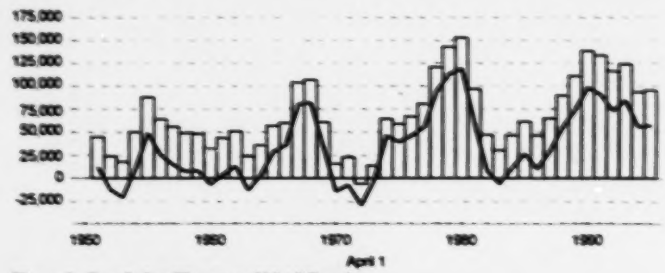

Figure 1. Population Change and Net Migration

Washington's cyclical pattern of migration is associated with expansions and contractions in the state's economy. During peak growth periods, such as the late 1970s and 1980s, annual migration gains more than double the gains due to natural increase. As migration slows, natural increase becomes a larger portion of population growth.

Growth picks up in the Puget Sound region, but less populated areas continue to post large gains. In the last five years, the pattern of growth in Washington has changed, shifting away from the densely settled Puget Sound toward less populated areas. Population growth in King, Pierce, Snohomish, and Kitsap Counties, which accounted for more than 70 percent of statewide growth through the 1980s, declined to only 34 percent of statewide growth by 1994. In 1995, Puget Sound growth increased slightly, representing 43.9 percent of total state population increase. Stronger growth in rural areas is consistent with a current trend known as the "rural rebound" which is impacting nearly all of the western United States. A similar increase in people moving to rural and unincorporated areas occurred in the mid-1970s, but reversed before the end of the decade.

Three of the top five counties with the fastest 1990-95 growth rates are those with good opportunities for recreation and retirement living. Jefferson had the fastest growth rate at (23.0 percent) over the last five years, followed by San Juan County (22.6 percent) and fifth ranking Mason County (18.2 percent).

Growth in eastern Washington continues to outpace growth in the west. The rate of population growth in Eastern Washington shows a generally steady increase since 1987, with the annual rate of change climbing from 0.1 percent in 1987 to a peak of 2.7 percent in 1993, and then modestly declining to 2.2 percent by 1995. The rate of population change in western Washington peaks at 3.2 percent in 1990, drops to about 2.4 percent for 1992 and 1993, and then declines further to 1.6 percent in 1994 and 1.7 percent in 1995. The 1994-95 population gains in the eastern part of the state account for nearly one-third of total state growth. Based on the 1995 population estimates, 22 percent of the state's residents live east of the Cascades.

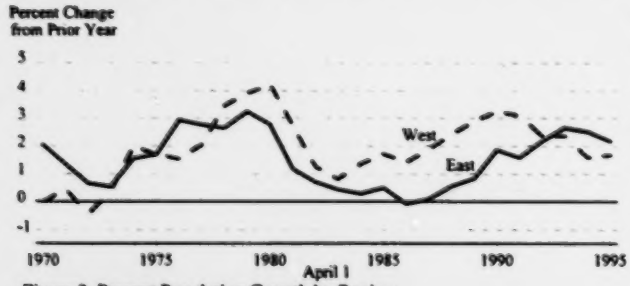

Figure 2. Percent Population Growth by Region

City and town populations increase by 331,699 over the past five years, an increase of 13.1 percent. Forty-two percent of the population increase in incorporated places is due to annexations and the incorporation of Burien, Woodinville, and Newcastle. Three cities--Bainbridge Island (formerly Winslow), Bothell, and Vancouver--gained more than 10,000 persons through annexation from 1990 to 1995. The state's three largest cities--Seattle, Tacoma, and Spokane--all posted substantial gains without large annexations. During the last five years, the population of Seattle increased by 16,641, Tacoma by 7,836, and Spokane by 11,635.

Notes:

The county and municipal populations shown for 1990 are, with a few exceptions, the 1990 federal census Summary Tape File 1 counts. Some 1990 counts may differ from the federal census.

• State Certified Special Census. A population and housing count that meets all special census certification requirements.

Informal Census. A population and housing count that is considered accurate but does not meet all special census certification requirements.

+ Informal Count. A population count that is considered accurate but does not meet all special census certification requirements.

$ Indicates a correction to the federal 1990 census count and/or a revised state estimate.

With the exception of corrections to the federal census counts, annual estimates in this official series are not revised on the basis of other information that becomes available after the estimate date. As a result, population estimates shown for individual years may not be comparable. Figures often vary due to data corrections or the use of new survey or census data that are not available on an annual basis.

Federal Way incorporated in February 1990.
SeaTac incorporated in February 1990.
Burien incorporated February 28, 1993.
Woodinville incorporated March 31, 1993.
Newport Hills incorporated September 30, 1995. Name changed to Newcastle in December 1995.
Winslow changed its name to Bainbridge Island in 1991.

***************** NOTE *****************

The Office of Financial Management (OFM) is responsible for April 1 population determinations that are used for state revenue allocations to local governments and in all state programs requiring population as a criteria for funding and/or administration. Population counts used by OFM in 1990 may differ from the 1990 federal census counts. Differences are noted below:

1. Corrections to the 1990 federal counts due to the misallocation of housing units and adjustment of Federal Way and SeaTac CDP boundaries to the city boundaries:

	FEDERAL					CHANGE			REVISED

** Notes: Sources of change in population and housing counts are labeled as follows:

A: Population and housing units added to the cities due to annexations through April 1, 1990,

B: Adjustment of Federal Way and SeaTac CDP boundaries to the city boundaries,

C: Special city April 1, 1990 censuses used in place of the federal censuses, and

F: Census Bureau's corrections to the federal counts due to misallocation of population and housing units.

State totals have changed due to the federal corrections to county population and housing units.

Office of Financial Management, Forecasting Division, 5/28/1993.

Note: The county and municipal housing units shown for 1990 are, with a few exceptions, the 1990 federal census counts. Federal census counts have been adjusted for annexations from January 1, 1990 to April 1, 1990.

* - The mobile home/trailer data for unincorporated areas may exclude changes in mobile home parks for all or part of the 1990-1995 reporting period. Mobile home/trailer losses tend to be underreported. The number of mobile homes and trailers in areas that have experienced a large outmigration will tend to be overestimated.

Housing unit estimates are revised on an annual basis to include the most current data available.

Fifteen to 20 percent of the mobile homes and house trailers in Washington are classified as single family houses in the decennial census. A negative figure in the mobile home/trailer category indicates a city has lost more mobile homes/trailers than we counted in the 1990 census. When using the housing data, the negative numbers should be subtracted from single family housing.

Federal Way incorporated in February 1990. SeaTac incorporated in February 1990. Burien incorporated in February 1993. Woodinville incorporated in March 1993. Winslow changed its name to Bainbridge Island in 1991.

Note: Annexed areas of less than 0.001 square miles are shown as 0.000 square miles.
All boundary changes are due to annexation unless otherwise noted.
Federal Way incorporated in February 1990.
SeaTac incorporated in February 1990.
Burien incorporated in February 1993.
Woodinville incorporated in March 1993.
Winslow changed its name to Bainbridge Island in 1991.

Note: Includes annexations, incorporations, and other municipal boundary changes. Annexed areas of less than 0.001 square miles are shown as 0.000 square miles.

* - Annexations approved by the Office of Financial Management.

** - Land area for 1980 was primarily supplied by municipal officials. Land area for 1990 was derived by adding annexed territory to the 1980 base. Land area may not be consistent with decennial census figures.

Federal Way incorporated in February 1990.
SeaTac incorporated in February 1990.
Burien incorporated in February 1993.
Woodinville incorporated in March 1993.
Winslow changed its name to Bainbridge Island in 1991.

Selected Estimates and Information

Selected estimates and other data used in developing population estimates are presented in this section. These include estimates of the elderly population, institutional population, and armed forces personnel. Other useful information is also provided.

Persons 65 years and over increase nearly 50,000 by mid-decade. Current estimates, based on Medicare data, show that Washington's elderly increased from 571,403 in 1990 to 620,640 by 1995, a gain of 49,237. Increases are expected to continue with the most rapid gains occurring after the turn of the century when the leading edge of the baby boom turns age 65. Persons age 65 or over now represent nearly one-fifth or more of the population in eight counties: Garfield (22.3 percent), Pacific (22.1 percent), Clallam (20.8 percent),Columbia (19.6), Jefferson (19.4 percent), Lincoln (19.4 percent), San Juan (19.4 percent), and Wahkiakum 18.8 percent).

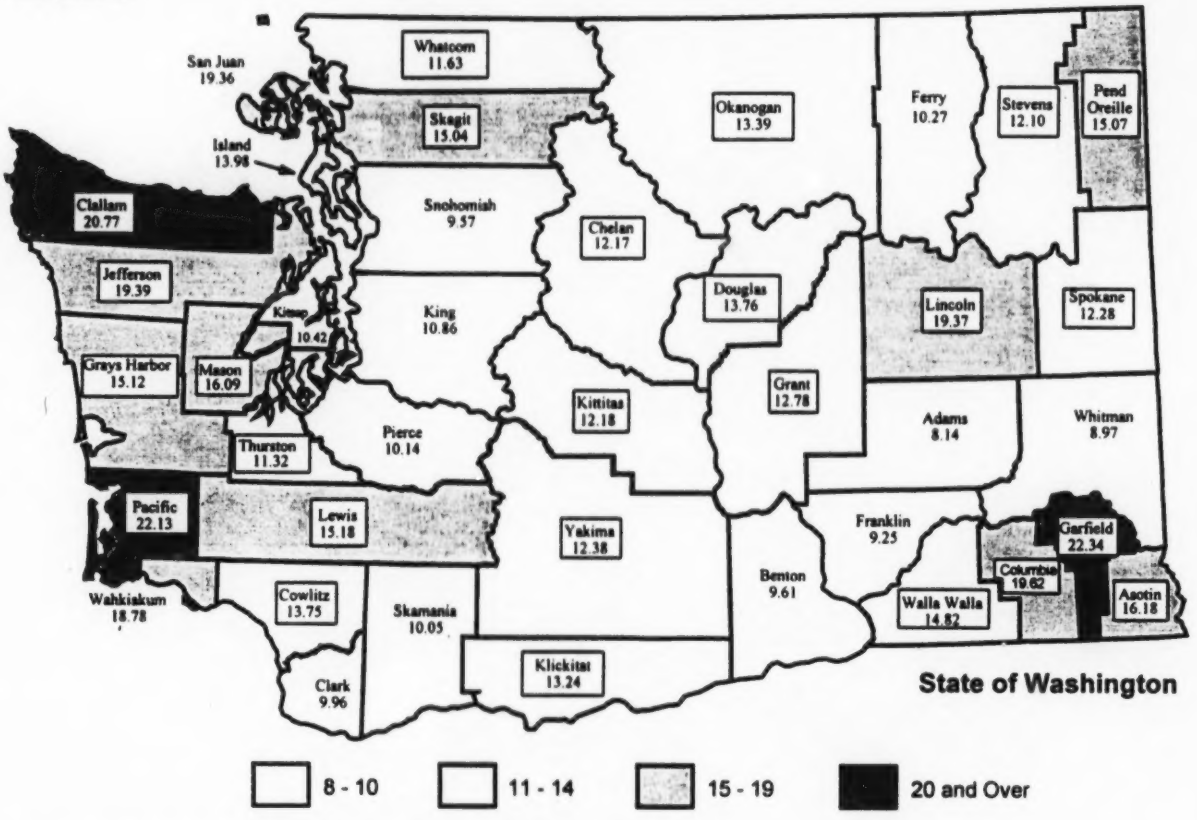

Figure 3. Percent of County Population 65 and Over

State and federal institutional populations up 27 percent since 1990. Persons in state and federal institutions now total 14,520--an increase of 3,078 since 1990. Institutional populations are often a major source of population change for cities and towns and are tracked annually. Other group quarters population that are a source of local population change include persons living in nursing homes, college dormitories, military barracks, or military personnel living in ships.

Annual births remain close to 80,000 per year. Annual births climbed from 70,000 per year in the late 1980s to 80,000 per year by 1992. This level far exceeds the baby boom peak of 65,000 births per year in the late 1950s and early 1960s. Most of the increase is due to increases in women of childbearing age and increases in births to women over thirty who are now having their delayed first or second birth. The annual number of births may decline slightly, but no substantial decline in births is anticipated.

Resident armed forces personnel remain below the 1990 census level. The state's resident armed forces personnel (excluding dependents) dropped from 53,896 in 1990, to 49,753 in 1993, with a slight increases to 50,073 in 1994, and 50,503 in 1995. Thus far, downsizing of armed forces nationally has reduced the level of units in Washington. It is anticipated that losses may continue to offset some of the expected increases, such as at the Everett Port Facility, and that armed forces personnel in Washington will remain relatively stable.

Notes: Estimates of median household money income for 1990 through 1993 are based on 1989 federal census money income data and 1990 through 1993 Bureau of Economic Analysis (BEA) county level per capita income data. Estimates for 1994 and 1995 are based on the state growth rate in per capita income as published by the Forecast Council. These growth rates are applied to the 1993 estimates produced by the more detailed model. The median measures the point at which half of all households have more income and half have less.

Money income, as defined and used by the Bureau of the Census, excludes some of the income components of personal income used by the BEA. For example, employer paid pension and medical benefits are included in personal income but not in money income.

Estimate methodology was revised in 1995 and estimates for 1990 through 1992 will not match prior publications.

The estimation model was respecified in 1995 and estimates from 1991 through 1993 have been revised.

Table 14

Marriages and Divorces/Dissolutions: 1954 to 1994

	April 1 Population	*Marriages Number*	*Rate*	*Divorces/Dissolutions Number*	*Rate*

Notes: Detail may not add to total. Unrounded numbers are not meant to imply precision. Annual populations developed between two federal decennial census counts are intercensal estimates. Estimation methods are more accurate when actual changes in population and the symptomatic data used to develop the estimates are known. Intercensal estimates by age and sex by county are available from OFM Forecasting. See Preface for address and telephone number.

Notes:

[1]The Other n.e.c. racial category is a count of persons who marked "Other Race" on the 1990 census questionnaire and wrote in entries such as Cuban, Puerto Rican, Mexican, etc. They represent persons who when given an opportunity to identify themselves in a racial category did not select White (or any other category), but specifically identified themselves as Cuban, Puerto Rican, Mexican, etc. In 1990, this category represented a count of 111,078 persons who considered themselves racially Hispanic and 4,435 additional responses that could not be elsewhere classified (n.e.c.).

[2]Hispanic Origin is not a racial category: it may be viewed as the ancestry, nationality group, lineage, or country of birth of the person or person's parents or ancestors before arrival in the United States. Persons of Hispanic Origin may be of any race and are counted in the racial categories shown. In 1990, 40.69% of persons indicating Hispanic Origin identified themselves as being racially White, 1.77% Black, 2.37% Indian, Eskimo, or Aleut, 3.4% Asian or Pacific Islander, and 51.77% [illegible] Other races category.

Notes:

[1]The Other n.e.c. racial category is a count of persons who marked "Other Race" on the 1990 census questionnaire and wrote in entries such as Cuban, Puerto Rican, Mexican, etc. They represent persons who when given an opportunity to identify themselves in a racial category did not select White (or any other category). but specifically identified themselves as Cuban, Puerto Rican, Mexican, etc. In 1990, this category represented a count of 111,078 persons who considered themselves racially Hispanic and 4,435 additional responses that could not be elsewhere classified (n.e.c.).

[2]Hispanic Origin is not a racial category: it may be viewed as the ancestry, nationality group, lineage, or country of birth of the person or person's parents or ancestors before arrival in the United States. Persons of Hispanic Origin may be of any race and are counted in the racial categories shown. In 1990, 40.69% of persons indicating Hispanic Origin identified themselves as being racially White, 1.77% Black, 2.37% Indian, Eskimo, or Aleut, 3.4% Asian or Pacific Islander, and 51.77% selected the Other races category.

[2]Hispanic Origin is not a racial category: it may be viewed as the ancestry, nationality group, lineage, or country of birth of the person or person's parents or ancestors before arrival in the United States. Persons of Hispanic Origin may be of any race and are counted in the racial categories shown. In 1990, 40.69% of persons indicating Hispanic Origin identified themselves as being racially White, 1.77% Black, 2.37% Indian, Eskimo, or Aleut, 3.4% Asian or Pacific Islander, and 51.77% selected the Other races category.

Washington State Data Center and Business and Industry Data Center

The Washington State Data Center (SDC) and Business and Industry Data Center (BIDC) represent federal-state cooperative programs sponsored by the U. S. Department of Commerce, Bureau of the Census. The Office of Financial Management (OFM) is the state agency responsible for administering these programs in Washington State.

A list of the Washington SDC/BIDC coordinating agencies and affiliate members is provided on the following pages. These organizations and contact persons play an important role in the release of 1990 census information. All members have a wide range of Bureau of the Census 1990 census data releases and summary data releases developed and distributed by OFM. Many of the larger participating universities, regional councils of governments, and county planning agencies have developed publications suited to supply the data most requested by local constituents. Several organizations provide specialized computer processing to meet individual data needs.
